

Hurricane House

Estimated Time: 30 Minutes

Materials:

- 1 aluminum pan per group
- Popsicle sticks
- Construction paper
- Tape
- Play-doh
- Water
- Fan
- Scissors
- Box fan

Instructions:

1. Have each student or each group of students construct a home out of popsicle sticks. Using tape and/or play-doh to hold the sticks together, construct a house to withstand wind and water.
2. Place house in aluminum tray of water.
3. Turn on box fan to see if house can remain intact with wind and water challenging the structure of the home.
