

Vilter™ Lifecycle Services

Ensure longevity, improve performance, increase efficiency

Extend the life of your refrigeration system with Vilter Lifecycle Services

Vilter has been manufacturing compressors for refrigeration systems for over 100 years. We understand that proper refrigeration – the difference between cool and frozen – impacts profit margins and business performance in the industries we serve. The best way to maintain the precise temperatures required to deliver on this is to maintain your quality-engineered equipment with components manufactured specifically for the machine.

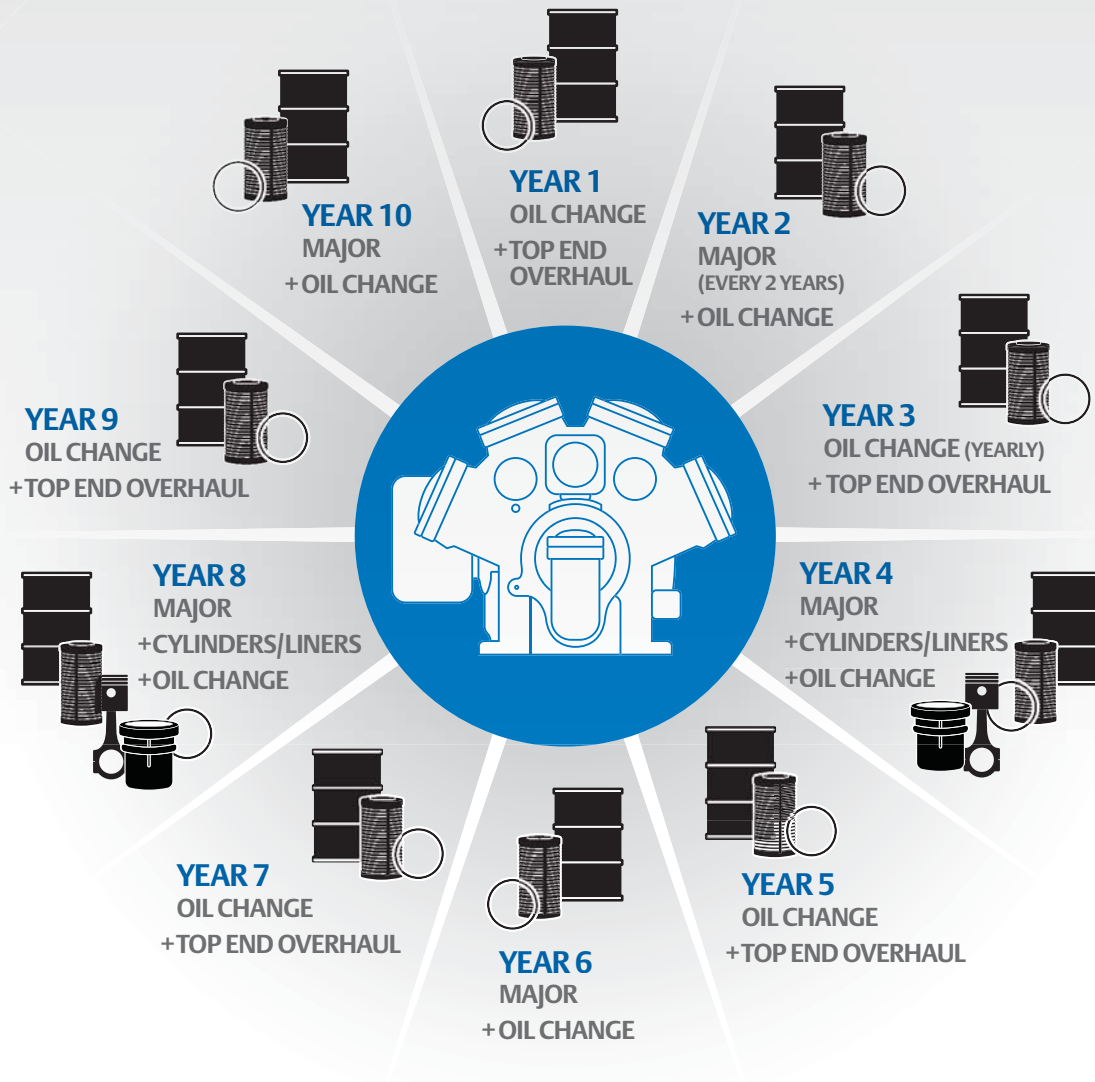

Extend the life of your compressor with Vilter Lifecycle Services

- Global sales and service support
- Vilter 1-year service parts warranty
- Reliable, approved and tested
- Part kits reduce maintenance time and improve uptime
- Genuine parts for optimum longevity and continued warranty
- Built-in protection against 95% of oil contaminants

Vilter Genuine Parts conform to our strict engineering standards to operate safely and efficiently in Vilter reciprocating and single screw compressors.

How does Vilter Lifecycle Services impact my compressor?

Single Screw Compressors

The single screw compressor is capable of operation across a wide load range. In order to operate efficiently these compressors require strict component designs, which are engineered specifically for handling the operating mechanics of the compressor.

Reciprocating Compressors

The Vilter reciprocating compressor is considered to be the longest lasting design available in today's market. Vilter engineered parts designed specifically to function with this compressor have earned this reputation.

Vilter Proprietary Oil Blend

Vilter oil blend 717 for screw compressors maintains a base formula with strict supply chain controls and metrics. These oils are formulated to ensure maximum longevity, performance, and efficiency of each of our compressor designs.

About Emerson

Emerson (NYSE: EMR), headquartered in St. Louis, Missouri (USA), is a global technology and engineering company providing innovative solutions for customers in industrial, commercial, and residential markets. Our Emerson Automation Solutions business helps process, hybrid, and discrete manufacturers maximize production, protect personnel and the environment while optimizing their energy and operating costs. Our Emerson Commercial and Residential Solutions business helps ensure human comfort and health, protect food quality and safety, advance energy efficiency, and create sustainable infrastructure.
