WHITE-RODGERS™

COPELAND

REPLACE MORE. CARRY LESS.

In light of rising operational costs, it's more important than ever to find ways to reduce expenses. White-Rodgers universal controls are designed to help you get more jobs done in one truck roll, increasing productivity and profitability.

Trust Copeland's comprehensive line of White-Rodgers universal electronic controls, gas valves, thermostats, and cooling controls to take any job from start to finish, **in one call.**

- **More cross references than the competition at comparable prices**
- **Trusted by more OEMs than any other brand**
- **Dedicated to innovation to make your job easier**
- **Contractor tools and support to ensure success**

Improve productivity.

Decrease costs.

Satisfy more customers.

Sound good?

2X THE CROSS REFS

With more than double the electronic control cross references as Resideo, you can carry fewer parts and make more replacements without having to return to the warehouse or distributor, saving you time and money.

LEADING INNOVATION IN ELECTRONIC CONTROLS

When it comes to providing the electronic controls you need to be successful in the field, White-Rodgers solutions have you covered. In the last 10 years, we've launched 47 new/ updated products designed to make your job easier.

We were the first to bring you:

- Controls designed for multiple blower types
- All-Spark™ Ignition Module configurable for either IP or DSI
- White-Rodgers Connect app for quick configuration and diagnostics of replacement controls
- Universal single stage IFC with no harnesses
- Universal defrost control with demand or timed defrost
- Universal SureSwitch™ contactor for multiple voltages

As the largest manufacturer of gas valves in North America, we know our stuff. That's why more OEMs trust us and you should too.

More than 95% of residential furnaces made within the last 18 years can be replaced with the White-Rodgers 36G/J series gas valves.

For commercial and industrial applications we offer the White-Rodgers 36H series gas valves, designed for high capacity HSI/DSI and intermittent proven pilot systems.
